

CZECH SOCIETY FOR PLANT PATHOLOGY

<https://www.vurv.cz/cspp/>

The Czech Society for Plant Pathology (CSPP) has been working since 1996, bringing together scientific, research, professional and pedagogical workers from the fields of Plant Pathology and Plant Health, primarily from the Czech Republic (the number of members fluctuates around 80). CSPP is directed by a seven-membered board, meeting 4-5 times per year.

Presidents of the CSPP

prof. Ing. Vladimír Táborský, CSc., Czech Agricultural University, Prague (1996–2007)
prof. Ing. Aleš Lebeda, DrSc., Palacký University, Olomouc (2007–2012)
prof. Ing. Radovan Pokorný, Ph.D., Mendel University, Brno (2012–2017)
Ing. Petr Komínek, Ph.D., Plant Crop Research Institute, Prague (2017–present)

Vice-presidents of the CSPP

prof. Ing. Aleš Lebeda, DrSc., Palacký University Olomouc (1996–2007, 2012–2020)
prof. Ing. Vladimír Táborský, CSc., Czech Agricultural University, Prague (2007–2009)
RNDr. Jan Nedělník, Ph.D., Research Institute for Fodder Crops, Troubsko (2009–2012)
Ing. Petr Svoboda, CSc., Hop Research Institute Žatec (2020–present)

CSPP develops international contacts both on the basis of individual contacts of its members as well as by cooperation within the framework of international organisations with a similar focus, the **European Foundation for Plant Pathology (EFPP)**, membership since 1996) and the **International Society for Plant Pathology (ISPP)**, membership since 2009). **Prof. V. Táborský worked as the President of EFPP in 2000-2002, and first scientific secretary of CSPP assoc. prof. Polák was Vicepresident of EFPP in 2002-2004.**

CSPP associates people interested in plant pathology to share and disseminate knowledge within this field. The main aim are publication activities, professional presentations, and conferences. CSPP organizes seminars and workshops focused on up to date problems of Plant Pathology.

Selected scientific conferences and workshops organized by CSPP within the years 2013-2022

2.-5.7.2013 - Wild Plant Pathosystems, 1st International Conference, Olomouc.
President and main organizer was prof. Aleš Lebeda; 80 participants; <http://wpp2013.upol.cz>

3.-6.9. 2013 - 2nd International Symposium on Plum Pox Virus, Olomouc.
President and main organizer was prof. Milan Navrátil (member of CSPP); 65 participants

28.5.2014 - News in protection and breeding of rapeseed, national workshop,
Mendel University in Brno.

1.-3.9.2015 - XXth Czech and Slovak Conference on Plant Protection
3.9.2015 - Pesticides in environment, national workshop.
Czech University of Life Sciences, Prague.

5.-7.9.2018 - XXIth Czech and Slovak Conference on Plant Protection
6.9.2018 - Powdery Mildews - fungi of the order Erysiphales - new insights into taxonomy, biology, plant-pathogen interaction, epidemiology and plant protection, international workshop.
Mendel University, Brno.

24.-28.6.2019 - EUCARPIA Leafy Vegetables 2019, 9th International Conference on Genetics and Breeding of Leafy Vegetables, Palacký University, Olomouc.

16.9.2020 – Plant resistance to diseases and crops as necessary part of integrated pest management, national workshop, Mendel University, Brno.

8.-9.9.2022 - XXIIth Czech and Slovak Conference on Plant Protection
Mendel University, Brno.

Funding opportunities for CSPP members

The Czech Society for Plant Pathology is financially independent organization which is not supported by the state or any other institution. CSPP promotes participation of its young members at scientific conferences dealing with topics of plant pathology and plant protection. To do so, the society organizes competitions and pays the conference fee for successful applicants.

Participants of XXth Czech and Slovak Conference of Plant Protection, 1-3 September 2015, Prague

Abstract

LEBEDA A., KROFTOVÁ V., KÚDELA V., BRAUNOVÁ M. (2014): Fifty-year anniversary of Plant Protection Science. Plant Protect. Sci., 50: 53–63

PUBLICATIONS

Members of CSPP participate actively and intensively in editorial and publication work for scientific (e.g. Plant Protection Science), and professional (e.g. Rostlinolékař – PlantDoctor) journals edited in the Czech Republic and abroad (e.g. European Journal of Plant Pathology, Archives of Virology, Fungal Ecology). The scientific journal **Plant Protection Science** is edited under the patronage of the Czech Academy of Agricultural Science in the Institute of Agricultural Economy and Information. The Editor-in-Chief is prof. Aleš Lebeda, Co-editor prof. Radovan Pokorný, former chairmans of CSPP.

Many members of CSPP participate in the activities of PPS Editorial Board, or help as reviewers.

Plant Protection Science is indexed on Web of Science with Impact factor = 1.414 (2021).

Česká fytopatologická společnost si v roce 2021 připomněla 25. výročí svého vzniku

Prof. Ing. Aleš Lebeda, DrSc., Katedra botaniky, Fytopatologická katedra, Univerzita Palackého v Olomouci, Ing. Petr Komínek, Ph.D., Oddělení ochrany plodin a zdravotní péče rostlin, Ústav rostlinné výroby, v.v.i., Praha-Ruzyně

Společnost čítala v roce 2021 více než 5000 členů (společnost je odborníků v ochraně rostlin a zdraví zvířat, kteří se zabývají fytopatologií, fytohygienou, fytofarmakologií a fytochemií). Společnost byla založena v roce 1996 a jejími zakladateli byli prof. Ing. Aleš Lebeda, DrSc. a prof. Ing. Radovan Pokorný, Ph.D. Společnost má za cíl šířit vědomosti v oblasti fytopatologie a ochrany rostlin a zdraví zvířat a poskytovat odbornou pomoc členům. Společnost organizuje vědecké sympozia, konference a semináře a vydává časopis Plant Protection Science. Společnost je členem Evropské společnosti fytopatologů (EFPP) a Mezinárodní společnosti fytopatologů (ISPP).

Panel mezinárodní vědecké konference fytopatologické společnosti je katedra fytopatologie a ochrany rostlin (American Phytopathological Society APSOL) a v roce 1998 v USA. V současnosti dělá se jedním z nejlepších a nejmodernějších odborných společností v této oblasti odborníků, kteří se zabývají ochranou rostlin a zdraví zvířat. Společnost je členem Evropské společnosti fytopatologů (EFPP) a Mezinárodní společnosti fytopatologů (ISPP). Společnost má za cíl šířit vědomosti v oblasti fytopatologie a ochrany rostlin a zdraví zvířat a poskytovat odbornou pomoc členům. Společnost organizuje vědecké sympozia, konference a semináře a vydává časopis Plant Protection Science. Společnost je členem Evropské společnosti fytopatologů (EFPP) a Mezinárodní společnosti fytopatologů (ISPP).
